

RAPID SHEET DRYER

CATALOGUE NO.: GEC-P40304

Rapid Sheet Dryer is used for rapid drying of handsheets after pressing, prior to evaluation. The uniformly distributed heat from the drying surface reduces the moisture content of paper samples. Rapid Dryer is intended for shortening the drying time of wet pulp or paper samples before determining the dry weight or moisture content.

Test Description:

Rapid sheet dryer is pre-set to the desired temperature by using the digital thermostat. A pulp sample or a wet test sheet is put on the heated glass plate and the top is closed. After the prescribed drying time the sample is weighed and the dry matter determined.

APPLICATIONS:

Paper, Paperboard, Tissue, Recycled Newspaper, Newsprint

APPLICABLE STANDARDS:

TAPPI T-205, SCAN M-1

Salient Features:

- Stainless steel sheet fabrications with insulating material ensure long service life.
- Target temperature and actual temperature are shown digitally.
- Controlled temperature through built-in thermostat.
- Provided with overheating protector and rectangular drying plates.
- Mirror-polished stainless steel heating plate.
- 2 different sizes (2 x A4 or 3 x A4).
