

SHEET PRESS
(HYDRAULIC TYPE)
CATALOGUE NO.: GEC-P40305-A

Sheet Press is designed for ease of operation and accuracy in forming handsheets in accordance with TAPPI standards.

Sheet press is used for pressing and dewatering of the hand sheet, quickly made on standard sheet making apparatus, must be pressed in uniform manner for the distribution of pulp across the area. The specimen is pressed by gradually raising the rubber diaphragm with strokes of piston, pushing up the floating pressure plate.

The Sheet Press is manually operated and plunger type pump is employed. The specimen is pressed by gradually raising the rubber diaphragm with strokes of piston, pushing up the floating pressure plate.

APPLICATIONS:

Pulp, Paper, Recycled paper

APPLICABLE STANDARDS:

TAPPI T-205, CPPA C.4, ISO 5269

Salient Features:

- Manually operated.
- Press top made of duralumin to give lightness and rigidity and Press plattens of stainless steel.
- Press top secured by 4 rapid action clamping and release nuts by facilitating taking in and out the specimen.
